Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-41 is/are pending in the application.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 15 appears to be identical to preceding claim 14.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 8, 13, 16, 19, 24, 25, 32, 35, and 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakurai.

The patent by Sakurai (4,760,824) shows a valve (30) in fluid communication with an airflow passageway. An electrically-operated valve movement mechanism (16) is operatively connected to the valve to selectively move the valve. Activation of the valve movement mechanism opening the valve to admit additional air into the airflow passageway. A valve switch (55) is electrically coupled to the valve movement mechanism for activation of the valve.

Art Unit: 3747

A processor (1) is electrically coupled to the switch for control of the valve and a power source is electrically coupled to the processor.

The power source comprises a battery (6).

A temperature sensor is interconnected with the processor. The temperature sensor provides a signal indicative of the engine temperature. The processor only activates the solenoid to open the valve when the engine temperature is within a predetermined range.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 4, 9-12, 14, 15, 17, 20-23, 26-31, 33, 34, and 37-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakurai.

The patent by Sakurai does not show details of the valve. It is the view of the examiner that a plunger valve is common in the art especially with solenoids, and is an obvious choice of design.

It is further the view of the examiner that the power source, be it battery, capacitor, or solar collector is an obvious choice of design.

Allowable Subject Matter

Art Unit: 3747

Claims 5-7 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Benton whose telephone number is (571) 272-4838. The examiner can normally be reached on flex.
